6-Point Hydraulic Patient Lift

Model No. 9805P

Safe, Confident Patient Transfers

Everyday Transfer Support

Versatile Low Profile

450 LB WEIGHT CAPACITY

Versatile Transfers, Multiple Slings

The Invacare 6-Point Hydraulic Patient Lift helps caregivers securely move patients between beds, wheelchairs, recliners, commodes, and other seating surfaces while reducing the physical demands of everyday transfers for caregivers.

Angled Mast Helps Reduce Patient Sway During Movement

Adjustable Base Legs for Improved Access

No Batteries Required

Lightweight 68 Lb Design

Smooth Positioning

The padded 360° 6-point swivel bar rotates to help position patients during transfers while supporting compatibility with multiple sling styles.

Compatible with a Full Portfolio of Invacare Slings

Full body slings • Divided leg slings • Toileting slings

Built to Reduce Caregiver Strain

Thoughtfully designed features help caregivers maneuver and position the lift throughout everyday care routines.

Dual-Side Pump Handle Operation

Rear Shifter Handle for Easy Leg Adjustment

Low-Profile Adjustable Base Legs Open Around Furniture

Low-Friction Wheels Help Reduce Straining

Reliable Daily Support

Built for routine patient transfers in homecare environments with practical features that help caregivers operate the lift with confidence.

- Homecare rehabilitation
- Floor-to-Bed Transfers
